PRODUCTS

ABOUT ICOFORM

ICOFORM is a leading European manufacturer with a long tradition of offering high quality polymer products for the automotive, household, industrial and agricultural sectors.

The company operates a manufacturing plant in Romania and a customer service center in Poland. As part of the ICOTEC.Group, we offer a wide range of innovative plastic solutions with decades of know-how.

Together with our group companies, ISOSPORT, ISOKON and TOMPLAST, we have the necessary flexibility to act as a reliable development partner and

strategic supplier worldwide. Products for the poultry layers & breeders sectors are manufactured in the same CIM technology as company's core products and are offered to the customers under the AstroTurf® brand.

The company focuses on close cooperation with nest producers providing a full offer of products intended for its final customers – poultry farms or specialized agriculture equipment distributors. Good quality of products and flexibility in meeting our customers' expectations enabled us to gain a significant share in the worldwide market.

ASTROTURF® EXTRA PERFORMANCE NEST PADS

New Nest Pads - tested and approved

Intensive tests on farms and at research centres have shown that the new AstroTurf® pads produce even better results. The AstroTurf® nestpad is made from a special polyethylene composition. The blades are tapered for better wear resistance. The rounded tops contribute to the hens' comfort, help to ensure a safe egg roll-off and reduce the number of feathers clinging to the shell. AstroTurf® is suitable for both breeders and commercial layers. The chestnut colour was chosen after intensive research.

Fewer dirty-shelled eggs, less cracks and breakage

The open structure of the new Nest Pad combined with the special shape and high flexibility of its individual blades, ensure that the eggs roll onto the conveyor belt safely and without contamination.

Fewer loor eggs

Hens find nests fitted with AstroTurf® attractive. They seem to prefer AstroTurf® to any other material. As a result, the number of floor eggs is negligible.

Cheaper and more profitable

Unhygienic litter is now a thing of the past, as is the intensive labour needed to keep replacing it. AstroTurf® lasts for several years. This will also increase farm profitability.

Easy to install and maintain

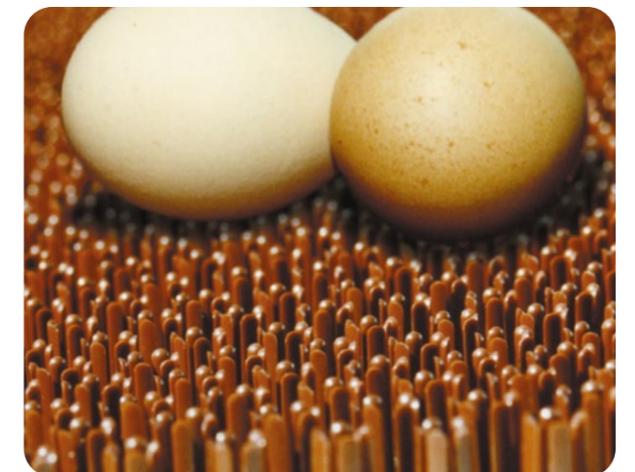

AstroTurf® is easy to cut to the right size. Once installed, it needs little maintenance. The open structure enables more dirt to fall through and the new design prevents dirt from sticking to the nest pad. The mat is therefore easy to clean.

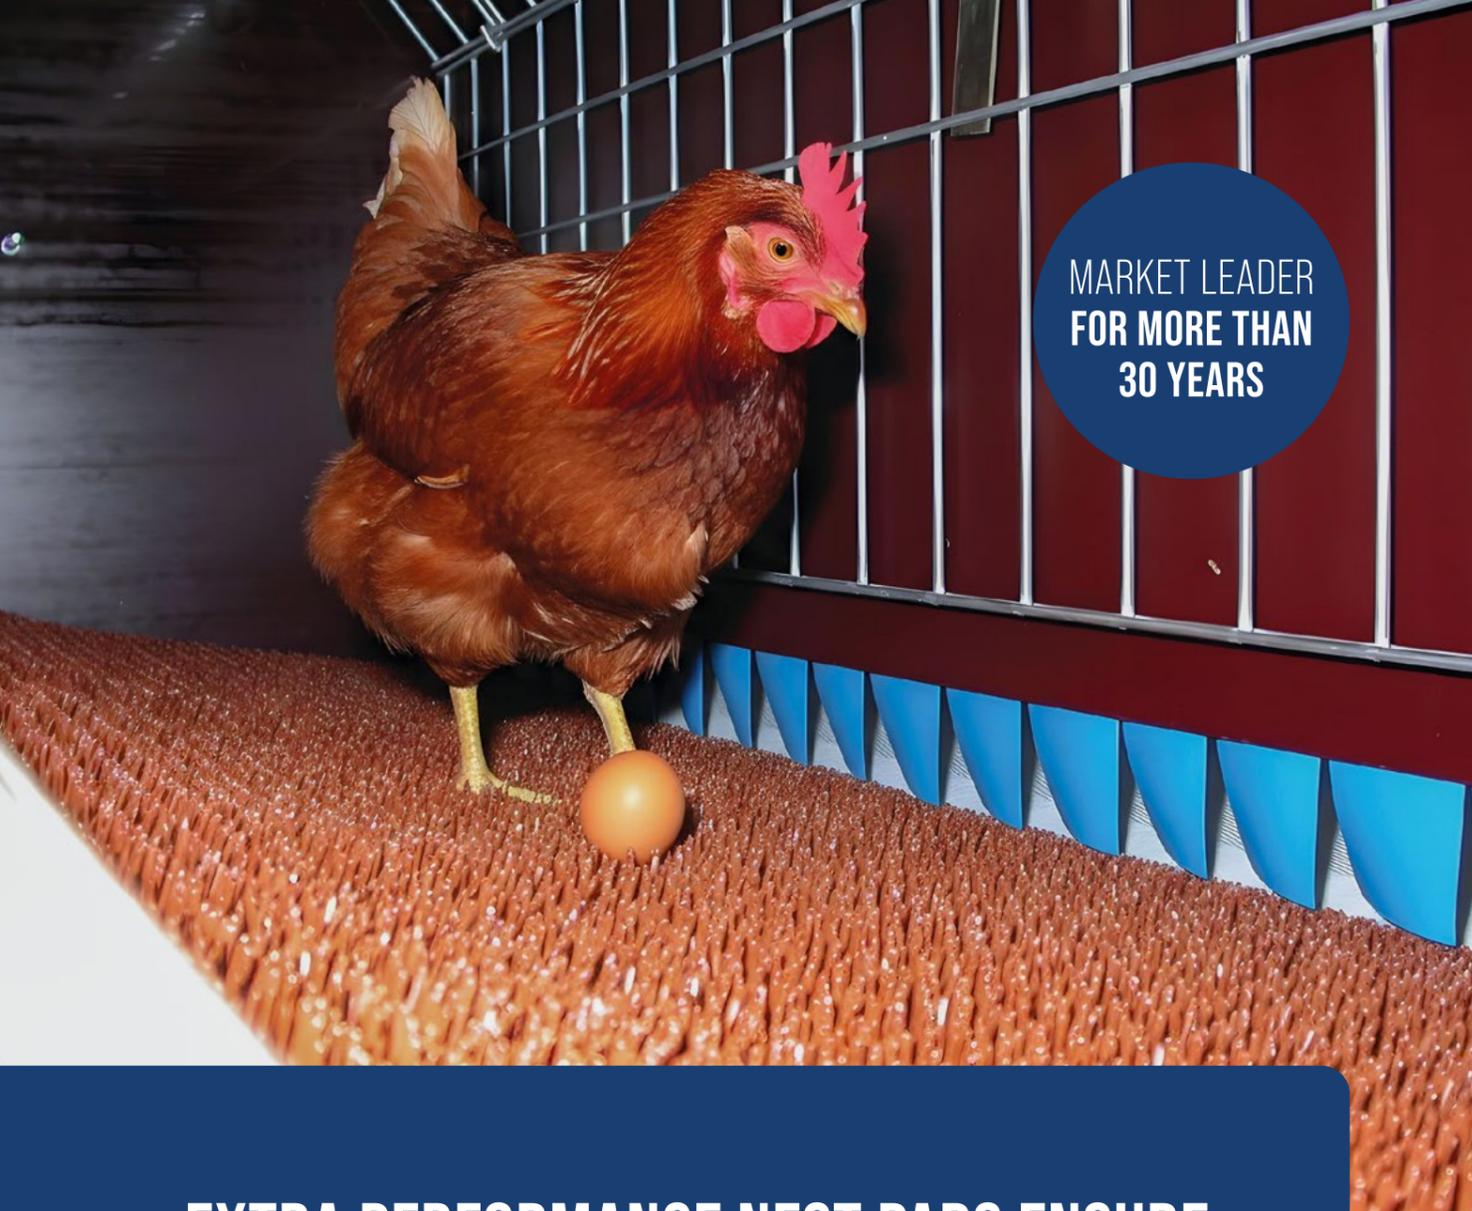

Market leader

AstroTurf® nesting material is a trendsetter. Most nest builders are already using it. AstroTurf® is often recommended by research centres and sector specialists too.

Product information

code: AstroTurf® Extra Performance Nest Pad
colour: chestnut brown
dimensions: 0.91 x 16m, 1 x 16 m, and all other dimensions with a maximum of 1000 mm in the width
height: 19 mm

MARKET LEADER
FOR MORE THAN
30 YEARS

EGG BELT COVER

Protect eggs from dust and other material that could damage the eggs.

EGG BELT COVER

Advantages

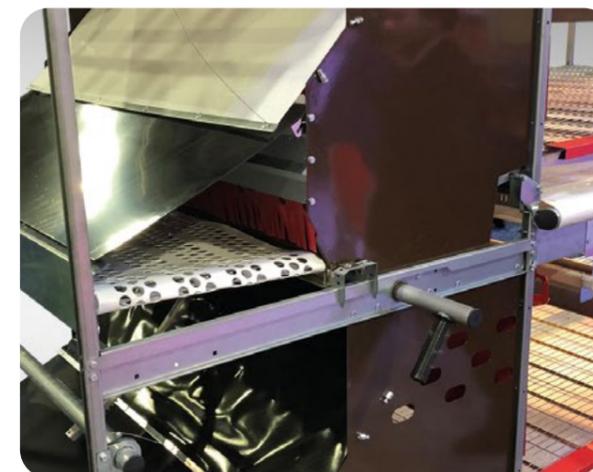

- Egg belt cover reduces dust on eggs
- Cheaper and lighter than metal
- No corrosion
- Durable and solid
- Easy to clean
- Optimal thickness

Specifications

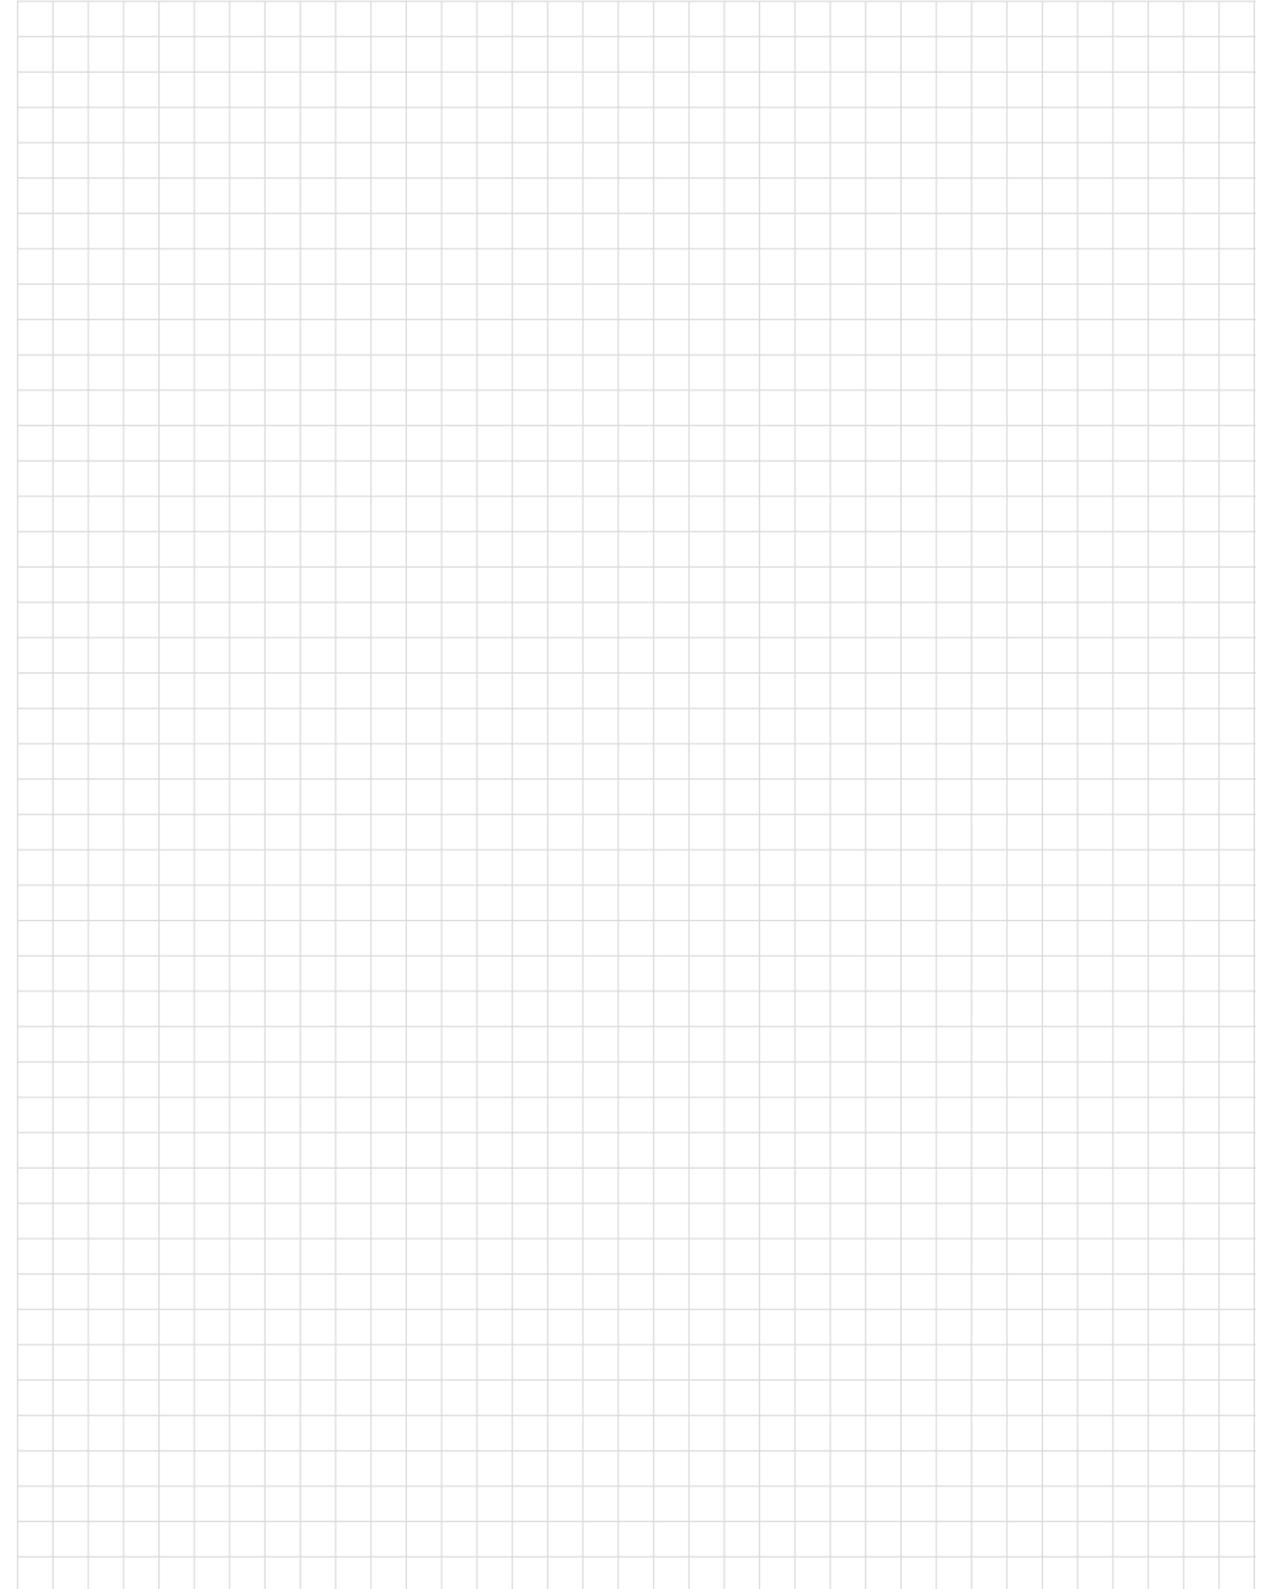

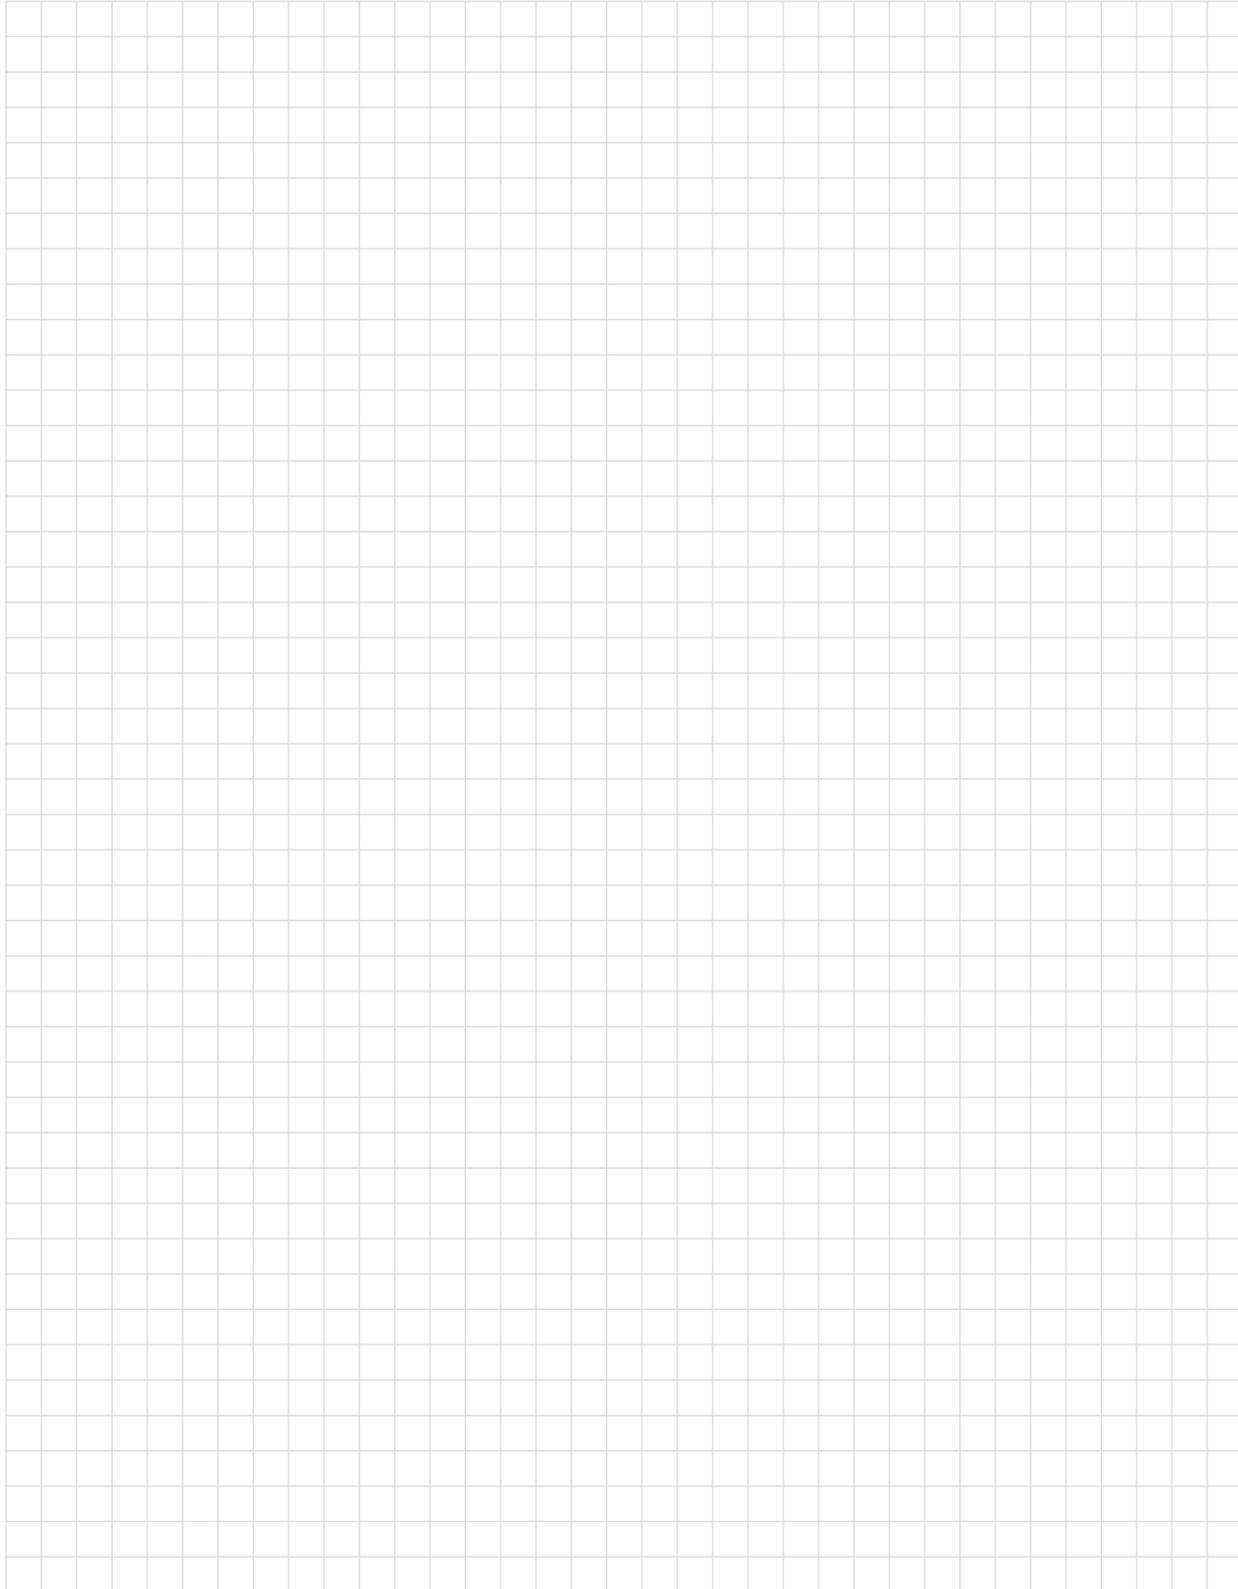

- Available thickness: from 0.8 to 8 mm (standard)
- Max width: 1.2 m
- Embossed or mirror finished
- Made of 100 % PE or PP
- 100 % recyclable
- Possible customization on request (welding, bending, holes, shape)
- Other thicknesses on request

EXTRA PERFORMANCE NEST PADS ENSURE:

- Attractive nest pad for fewer floor eggs
- Thick and strong blades give higher resistance and durability
- Large spaces between blades resulting in less egg contamination and easy cleaning
- Rounded blade tips minimize contact with the egg and reduce the number of feathers clinging to the shell
- Can be used for both breeders and commercial layers
- Suitable for all kinds of nests (all dimensions possible)
